## Wednesday Challenge Form

Group Members: Elisabeth, Cole

Problem Statement: build a paper airplane and switch with another group and build their airplane then make it fly.

Approach: we first built a normal plane and handed that off. Then we got a plane and made that one from the directions. After that we decided that it wouldn't fly so we crumpled it up into a ball and threw that.

Solution: make precise folds so the plane can fly accurately

Lessons Learned: Follow the directions
